Sharpening your hidden skills for a brighter future

Web Development

Web Development is the process of building and maintaining websites and web applications. It involves technologies like HTML, CSS, and JavaScript to create interactive and responsive user interfaces. Frameworks and tools such as React, Node.js, and Django are widely used in modern development.

Web development is used to create websites, e-commerce platforms, and web-based systems for businesses and organizations. It includes frontend, backend, and full-stack development. Companies like Facebook and Netflix rely heavily on web technologies to deliver their services online.

Task 3: Music Player

- Design a web-based music player with playlist functionality.
- Include features for searching and categorizing music.
- Implement play, pause, skip, and volume control functionalities.

Task 4: Social Network Platform

- Develop a full-fledged social networking platform with user profiles, posts, comments, likes, and friend requests.
- Implement real-time updates using Web Sockets.
- Include features like notifications, privacy settings, and multimedia content sharing.

Submission Guidelines

1. Prepare a **detailed report** of your work and completed projects in a Word document.
2. Include a **code section** within the report explaining your implementation.
3. Attach **relevant images/screenshots** demonstrating the working of your project.
4. Mention your **Full Name, Internship Domain, Email Address, and Phone Number** on **Front Page**.
5. Convert your report into **PDF format** before submission.
6. Use the file naming format: **Name_Domain_Month1** or **Name_Domain_Month2** (as applicable).
7. Submit the PDF via email to **submissions.archtech@gmail.com**.
8. Additionally, upload your work on **LinkedIn** and mention **@Arch Technologies** in your post.
9. Ensure your submission is **well-structured, complete, and professionally presented**.
